PRIDE'S GLADIOLUS

Box 431A • Worcester, Mass.

CLASSIFICATION

The following table will allow you to know in advance in which class you can enter gladiolus varieties in the larger shows. The number following the variety name gives the size and color class figures. Following this is the name of the originator and the year the variety was first made available to the American purchaser.

For example, **BIG TOP**, (541 Rich 1942) means Big Top is classified under number 541. The 500 means that it belongs in the Giant Glad Class (5½" flowers or larger). The 41 means it is a light pink with markings. It was originated by Rich and released for sale in 1942 for the first time.

CULTURAL NOTES

Open packages of bulbs as soon as received. Store in a cool dry place until planting time.

Planting Any time from early spring as soon as the ground is usable until late June. Plant in an open sunny place. Glads will grow in any kind of soil but do best in a sandy, well drained loam.

Fertilizers Any good fertilizer will give good results. A good potato fertilizer is fine. Mix fertilizer into soil carefully and then place bulbs an inch or two above soil containing fertilizer. Plant from 3 to 6 inches deep depending on the size of bulb.

Disinfecting Dip all bulbs and bulblets in a disinfectant in order to kill thrips and to prevent possible disease infection on the bulbs. Burn all bulbs showing rot.

Cutting The spikes should be cut when the first floret is in full bloom. Always leave four leaves on the plant when cutting to develop the bulb for next year.

Digging When the foliage begins to turn brown, it is time to dig the bulbs. Cut tops off close to the bulb. Dry the bulbs for about two weeks. After this time the old bulb and roots can be removed and thrown away. Do not remove the husks on the new bulbs as they protect the bulb during storage.

Storage Store bulbs in trays or bags or boxes at a temperature of around 40 degrees. Give bulbs a light dusting of DDT 5%. This will eliminate any danger of thrips feeding on the bulbs during storage.

DIPPING, DUSTING AND SPRAYING

Lysol Dip —4 tablespoons of Lysol, 3 gallons of water. Soak bulbs in the Lysol solution for between 3-6 hours; soak bulblets overnight or for 12 hours. After bulbs or bulblets are removed from solution, allow to drain and plant the same day as treated, preferably while still wet.

Dusting for Thrips When the plants are in the third leaf they should be dusted with 5% DDT every two weeks. Best results will be obtained while the dew is still on them.

Spraying for Thrips —1 rounded teaspoon of 50% DDT, $\frac{1}{2}$ teaspoon of Dreft, 1 gallon of water. For larger plantings— $\frac{1}{2}$ lb. of 50 % DDT, $\frac{1}{2}$ pint of liquid soap, 25 gallons of water. The wettable form of DDT should be used when using a spraying material. Lysol, and DDT are poisonous, so take care in handling these materials. DDT dust must not be inhaled.

INSTRUCTIONS FOR ORDERING

Ordering List carefully varieties wanted on order blank. Add up. Figure discount and add extra bulbs you have chosen to your order. All orders are postpaid anywhere in the United States.

Extra Bulbs On orders accompanied by full payment, if order amounts to \$5.00 or more, add 5% extra in your own choice of bulbs. On orders over \$10.00, select 10% extra. Over \$25.00, select 15% more.

Terms of Business Cash with order. We will refund purchase price of bulbs if they are found unsatisfactory upon receipt and returned to us immediately at our expense. We cannot guarantee results as planting conditions vary so greatly. We make every effort to send out only the finest stock available. Minimum order—\$3.00.

Acknowledgments We acknowledge all orders as soon as possible. Please hold the acknowledgment until bulbs have been received.

Early Orders Please order as soon as possible if you sincerely wish to grow certain varieties. Stocks of some are already low and many will be exhausted long before planting time.

Size of Bulbs (L) Large means $1\frac{1}{4}$ " in diameter or larger. (M) Medium means $\frac{3}{4}$ " to $1\frac{1}{4}$ ". (S) means $\frac{1}{4}$ " to $\frac{3}{4}$ ". (B) Bulblets. Packages of bulblets run from 40 to 60, depending on the value of the variety.

Bulblets Expensive varieties should be peeled before planting. Always plant soon after peeling as they dry up quickly. Bulblets should be kept moist during the growing season to get the best results.

Rates 5 bulbs may be purchased at ten rate. 10 bulbs or bulblets, at 8 times single price. 25 at 100 rate. 100 bulbs or bulblets, at 8 times 10 rate.

NEW INTRODUCTIONS

We are proud to be able to participate in the introduction of the following three exceptionally fine varieties. We first saw **LUXURY** as a seedling in 1949 at the Binghamton Show and have waited impatiently for stock of it to be released. Now, its originator, Herbert Evans, has given us permission to list this magnificent clear giant orange pink. At the exceptionally low introductory price, it is probably the best buy of the year

Last summer, we were more than excited over the wonderful showing of seedlings displayed by the Laruses. At Boston, Hartford, and Binghamton we admired many of their new originations. **STYLISH**, one of their seedlings that amassed an enviable record in several trial gardens this last year is a fine medium pink. We are happy to be able to offer this variety to our customers for the first time this year.

LEAH GORHAM was one of the most outstanding novelty glads we saw during the 1950 season. We have always been exceptionally partial to blotched varieties, especially when the blotch is large, clean and contrasty. We venture to say this is the finest introduction yet of this type. Again, an introductory price which is very low allows everyone to enjoy this exciting new variety in its first year of release. You can't possibly go wrong on these three new varieties.

Luxury (530 Evans 51) Giant unmarked light orange pink. Creamy blend on lip petal. Strong habits. Midseason. Valleevue Test Rating 92-A-A. All spikes, from whatever size bulb, have beautiful, double row placement with strong floret attachment. Easily propagated. Has won several championships in seedling classes for two years. Up to 10 large beautiful flowers open at once, but averages around 7 or 8.

Bulbs, any size, your choice, \$1.50 each. No special rate for 10. Units of 10 bulblets sold independently for \$1.50. No smaller quantity of bulblets sold.

Stylish (440 Larus 1951) A medium pink shading to a lovely creamy pink throat with a small deep pink dotted blotch at the back. Heavily ruffled 5" florets, strongly attached and of good substance. Up to 10 flowers open at once but usually averages 6-7. Excellent placement and has never been known to crook. One of the loveliest pinks. Easy to grow.

Large, \$2.00 each. Medium, \$1.50. Small, \$1.00. Bulblets 25 cents each.

Leah Gorham (450 Gorham 51) Our most exciting new novelty discovery for 1951. A clean light red with a large pure white throat blotch. Very striking and attractive. 5 to 7 lightly ruffled florets open at once. Medium heavy substance. Propagates well. Bulblets grow very well. Healthy and easy to grow. Should be a cut flower and exhibition sensation. Very reasonably priced for a new introduction.

Large, \$1.00 each. Medium 75 cents. Small 50 cents. Bulblets 2 for 25 cents.
